Committee positions are voted on at the first Executive Committee meeting after the AGM.

The Canberra Snake Tracking Project

First study looking at the habitat use and movement behaviours of Eastern browns in the urban landscape, along with the welfare implications of snakes being displaced from their home range by snake catchers

Three key components to it:

1. *Implanting radio transmitters into the body of a sample of brown snakes and intensively tracking their movements*
2. *Genetic, dietary and population relationship analysis via biological samples*
3. *Micro-chipping to determine recapture incidence*

Sample of 12 adult eastern brown snakes

- *A control and experimental group*
- *Exploring differences in habitat use and behavioural activity*
- *Welfare impacts of translocation*
